**HTI FILTRATION CAN UNLOCK THE POTENTIAL OF YOUR
BIO-LUBRICANTS AND EXPAND YOUR APPLICATIONS**

“GREEN LINE “ FILTERS CAN -

- Remove oxidization products to keep your fluid stable
- Prevent varnish build-up in valves and spools
- Remove and lock up water before it can destroy your oil
- Maintain lubrication film properties under harsh conditions
- Provide longer service life for bio-lube products
- Remove silt, fines and abrasive debris to 1 micron
- Maintain your lube in cleaner than new condition
- Takes your bio-lube to new levels of performance
